Qlik Q
LEAD WITH DATA

Enhance the Value of SAP Data

Enable Real-Time Integration for Analytics with Qlik Replicate

Benefit from making live production SAP data seamlessly available – wherever needed – across diverse platforms and hybrid environments.

Benefits of real-time data integration for analytics

- Fast decision-making
- Optimized customer service
- Improved operations
- Competitive advantage

CHALLENGES WHEN REPLICATING SAP DATA TO HADOOP, CLOUD OR OTHER PLATFORMS

It's difficult to make sense of SAP data by simply examining physical database instances, independent of the applications, without the transparency of crucial business rules.

→ Too manual   → Costly   → Time-Consuming

REQUIREMENTS WHEN ADOPTING A MODERN DATA PLATFORM TO COMPLEMENT SAP APPLICATIONS AND ADDRESS COMPELLING NEW ANALYTICS USE CASES

Broad support for replicating documents, transactions, and business data from any standard SAP module or industry-specific module

Universal access to make data seamlessly accessible across data warehouses, Hadoop, and other platforms, on-premises or in the cloud

Real-time data integration that supports analytics with live production copies

Fast decoding of SAP data through a common data model for business use

Low data integration project cost and complexity

Minimal-to-zero production impact

Use Cases

When users are remote, intuitive ramp-up is critical. And because users want insights to come to them, the delivery of micro-insights and data stories will increase. In addition, empowering users to access data and insights earlier will enable the move from visualization self-service to data self-sufficiency.

Live SAP Data Ingest for Hadoop Data Lakes and Kafka

Live SAP Data Ingest and Migration for Cloud Analytics

Enabling Self-Service for Real-Time Business Intelligence

Real-Time Data Warehousing with SAP Application Data

Benefits of real-time data integration for analytics

- Deep SAP Integration
- Real-Time Data Integration
- Automation
- Secure and High-Speed Data Transfer to the Cloud

ENABLE UNIVERSAL SAP DATA AVAILABILITY FOR YOUR ANALYTICS

Qlik delivers an intuitive, automated replication interface that supports all core SAP business applications, such as ERP (ECC), HR, CRM, industry-specific solutions, and custom SAP modules.

- ✓ Easy Access to SAP Data
- ✓ Low Administrative Overhead
- ✓ Real-Time Integration with CDC Technology
- ✓ Secure and High-Speed Cloud Data Transfer
- ✓ Broad Heterogenous Target Support
- ✓ Low Performance Impact

Qlik Replicate for SAP Environments

Qlik delivers an intuitive, automated replication interface that supports all core SAP business applications, such as ERP (ECC), HR, CRM, industry-specific solutions, and custom SAP modules.
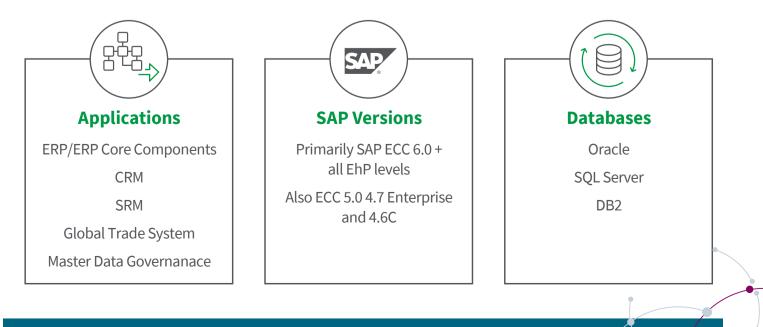

Applications
ERP/ERP Core Components
CRM
SRM
Global Trade System
Master Data Governanace

SAP Versions
Primarily SAP ECC 6.0 + all EhP levels
Also ECC 5.0 4.7 Enterprise and 4.6C

Databases
Oracle
SQL Server
DB2

Qlik Replicate for SAP reduces the cost of data management and cuts your IT costs with end-to-end automation of the replication process, while also improving decision support and boosting agility.
